# Operation SILENT LANTERN — Parallel CTF — Facilitator Guide

*Instructor-only | Timing, prompts, scoring, and control points*

## Learning Objectives (Observed Behaviors)

- Select an appropriate workflow based on device type/state and investigative priority.
- Use Extraction Wizard to configure and execute targeted collections and produce UFDX outputs.
- Use Triage profiles/scans to confirm watchlist hits and prioritize next actions.
- Execute SIM extraction and pivot to related identifiers.
- Apply preserved handling for restricted evidence and articulate integrity validation steps.
- Produce a concise, evidence-backed intelligence lead package.

## 6-Hour Run-of-Show

| | |
|---|---|
| 00:00–00:20 | Briefing: scenario, ROE, scoring, Forms access, evidence handling. |
| 00:20–01:10 | Mission 1: case setup + plan. Validate teams created Case ID and set paths. |
| 01:10–02:05 | Mission 2: Content Types collection on Android. Coach on speed-to-first-intel. |
| 02:05–03:00 | Mission 3: Triage scan with watchlist. Ensure teams interpret Major/Minor correctly. |
| 03:00–03:10 | Break / inject update (optional). |
| 03:10–04:00 | Mission 4: SIM extraction. Pivot to prior indicators. |
| 04:00–04:50 | Mission 5: Preserved iOS workflow. Authorization gate at ~04:25–04:35. |
| 04:50–05:40 | Mission 6: Fuse + brief. Collect final intel summaries. |
| 05:40–06:00 | Hotwash: compare approaches, discuss decision points, reinforce SOPs. |

## Instructor Control Points

- Authorization Gate (Mission 5): Release AUTH code only after teams demonstrate preserved handling notes and explain why restricted handling is used.
- Hint Economy: Each team gets 3 hint tokens; each token = –2 points. Record token use on a whiteboard.
- Optional Intel Inject (~03:00): Provide an updated keyword or phone number; require teams to re-run a quick targeted check (Triage or Content Types).
- Safety & Compliance: Enforce ‘training devices only’ and documentation discipline.

## Scoring (Suggested)

- Flags (6 × 10 pts) = 60
- Mission analysis questions (approx. 6 × 5 pts) = 30

- Final intelligence summary = 10
- Speed bonus (optional): Top 3 teams +5/+3/+1

# Facilitation Prompts (Use as Coaching Questions)

- What is your ‘speed to first intel’ plan, and what are you deferring for later?
- Which extraction method best matches your mission question right now (Content Types vs Triage vs full extraction)?
- What makes this indicator reliable (cross-corroboration across artifacts)?
- If you hit friction, what logs or status indicators can you capture to document the issue?
- How would you brief this to a commander in 60 seconds?
